division of regional medical programs

FIRST COMPUTER MAILING by
Division of Regional Medical Programs

December 2, 1968

This issue of News, Information and Data is the first to be mailed using labels printed by computer.

The use of the computer was adopted as the most efficient method for maintaining an accurate and up-to-date listing of all organizations, institutions, and individuals involved with or interested in Regional Medical Programs, separately and collectively. In addition, the computer can provide supplementary information about the ever-growing number of people this list contains and offers various possibilities for storage and retrieval of pertinent information relative to these institutions, organizations and individuals and their relationships to Regional Medical Programs.

A change in any name, title, or address should be indicated on the mailing label of the envelope and returned to .....
